

AG TECH
TECHNICAL SOLUTIONS

ON A WAVE OF NEW OPPORTUNITIES

www.ag-tech.kz

AG TECH is a qualified supplier of innovative IT software and hardware, factory automation and business intelligence systems, as well as a leading supplier of radio-navigation equipment.

Our key partners are the world's leading manufacturers of underground radio equipment Mine Radio Systems and PBE GROUP, with over 800 engineering projects under their belt, including 20 in the Republic of Kazakhstan (Kazakhmys Corporation; Kazzinc; Vostoktsvetmet; Kazchrome, etc.), in the field of automation, security and communication in the mining and industrial sector

The main activity of the company is the development and implementation of dispatching and management systems for mining production that meet all modern requirements, with flexible and individual adaptation directly for each project.

OUR ACHIEVEMENTS

Every 4th server in Kazakhstan sold by our team

We offer optimum configurations in large volumes, in the best price/quality combination on the market

Developed and implemented the DMMS mining management system

A domestic information and analytical system has been implemented in the largest mining companies in Kazakhstan. DMMS is included in the register of trusted software

Interactive Information System of KazMunayGas Dispatch Centre

Our team has deployed and maintains an information system covering all production cycles in refining

5 years of leadership in the air navigation systems market

Our air traffic control systems are present in every region of Kazakhstan

80% of Hewlett Packard Enterprise sales in Kazakhstan

More than \$100 million worth of equipment has been delivered by our team's certified specialists

Designed and built the largest data centres in Kazakhstan

In cooperation with the international company Uptime Institute, we certify data centres to the international Tier III standard

Certified to international standards

The company's processes meet the criteria and requirements of international ISO standards

Largest taxpayer in Kazakhstan's IT sector

Honesty, openness and a responsible approach to the interests of the state and society are our key priorities

Member of the American Chamber of Commerce in Kazakhstan

Actively promote trade, investment, technology transfer and exchange of expertise between countries

Accredited as a subject of scientific and scientific-technical activity

AG TECH LLP is a member of the Innovation Cluster "Park of Innovative Technologies" (certificate registration number 03-358)

AG TECH has the status of a domestic manufacturer

The company is included in the Register of Domestic Manufacturers of Goods, Works and Services. Industrial certificate No. 101 2 000 28 of 19.08.22

OUR PRODUCTS

DMMS

Production management system

DMMS is a tool for operative, safe and efficient production management, as well as an effective solution for ensuring the safety of personnel and increasing the productivity of business processes in an industrial enterprise. Positioning and monitoring of personnel, self-propelled and stationary equipment, video surveillance, gas analysis, electronic work orders, medical records, ratings, etc.

DMMS ANTI-FATIGUE SYSTEM

Driver fatigue monitoring system

DMMS module - designed to ensure the safe operation of heavy equipment by monitoring, controlling and maintaining driver availability. Works in conjunction with smart bracelets

VIBRATION DIAGNOSTICS SYSTEMS

Vibration monitoring systems are widely used in industry.

The technological implementation is based on the application of data processing methods over a long period of time, making it possible to predict equipment failures, timely maintenance and repairs

DMMS INVENTORY MANAGEMENT

Management of inventories

The system provides centralised and reliable information on warehouses and suppliers. Allows the automation of receipt, sale, write-off and movement of inventories

DMMS VEHICLE MANAGEMENT

Transport infrastructure management

Vehicle Management is a DMMS module with extensive functionality for monitoring and controlling the transport infrastructure using a large number of vehicles. Positioning, digital job cards, fuel monitoring, engine operation, etc.

DMMS SMART BRACELET

Smart bracelet with secure casing, precise positioning module (positioning accuracy up to 10cm), access control via NFC module and wireless charging

"Full construction" of dispatch and analytical center

"Turnkey"

Renovation of existing premises including installation and connection of engineering networks; installation and commissioning of high-tech equipment; server and computer equipment including equipment for processing and output of audio-video streams; creation of an automated control system for the control and analysis centre

DMMS
DIGITAL MONITORING & MANAGEMENT SYSTEM

Production Management System

A powerful tool to monitor, analyse and manage the entire production cycle of mining and processing plants

DMMS
OIL&GAS ANALITICS

DMMS OIL&GAS ANALITICS

An aggregated system combining data on oil production and refining, stocks and sales of petroleum products throughout Kazakhstan

OUR KEY AREAS OF FOCUS

**ENTERPRISE
& DATA CENTER**
SOLUTIONS AND SERVICES

Hardware support

Modern IT solutions:
Server and network equipment, IT infrastructure
software and data centres. IT services and
outsourcing

**SKY
CODING**
LABORATORIES

Software development

Software development using advanced information
technology for enterprise automation and
management

**OMEN
DESIGNS**
UI & ANALYTICS

Analytics and design

Business process analytics and visualisation
services, design and construction of control
centres for industrial companies

RNS
RADIO NAVIGATION SYSTEMS

Navigation systems

Design, supply, installation and maintenance of
radio navigation equipment and air traffic control
systems

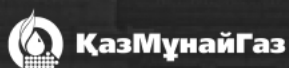

**DRONE
SOLUTIONS**
ADVANCED TECHNOLOGY

Drones and robotics

Using UAVs for professional tasks in large
industrial areas

OUR MAIN PARTNERS AND CUSTOMERS

📍 Republic of Kazakhstan, Astana city, K. Zhalairi st. 2,
business center Status, 5th floor
